

## GUIDE TO AUTHORS

1. Manuscripts shall be submitted to the online submission system using Microsoft Word in an IBM/PC format. Manuscripts should normally be limited to the space equivalent of 6,000 words. The editor may waive this requirement in special occasions. As a guideline, each page of a double-spaced manuscript contains about 300 words. Include on the title page the names, affiliations, and addresses of all the authors, and identify one author as the corresponding author. Because communication between the editor and the authors will be electronic, the email address of the corresponding author is required. Papers under review, accepted for publication, or published elsewhere in journals are normally not accepted for publication in DEStech journals. Papers published as proceedings of conferences are welcomed.
2. Article titles should be brief, followed by the author's name(s), affiliation, address, country, and postal code (zip) of author(s). Indicate to whom correspondence and proofs should be sent, including telephone and fax numbers and e-mail address.
3. Include a 100-word or less abstract and at least six keywords.
4. Art that is sent electronically should be saved in either a .tif or .JPEG files for superior reproduction. All illustrations of any kind must be numbered and mentioned in the text. Captions for illustrations should all be typed on a separate sheet(s) and should be understandable without reference to the text.
5. DEStech uses a numbered reference system consisting of two elements: a numbered list of all references and (in the text itself) numbers in brackets that correspond to the list. At the end of your article, please supply a numbered list of all references (books, journals, web sites etc.). References on the list should be in the form given below. In the text write the number in brackets corresponding to the reference on the list. Place the number in brackets inside the final period of the sentence cited by the reference. Here is an example [2].

*Journal:* 1. Halpin, J. C., "article title", *J. Cellular Plastics*, Vol. 3, No. 2, 1997, pp. 432–435.

*Book:* 2. Kececioglu, D. B. and F.-B. Sun. 2002. *Burn-In Testing: Its Quantification and Optimization*, Lancaster, PA: DEStech Publications, Inc.

6. Tables. Number consecutively and insert closest to where first mentioned in text or type on a numbered, separate page. Please use Arabic numerals and supply a heading. Column headings should be explanatory and carry units. (See example at right.)
7. Units & Abbreviations. SI units should be used. English units or other equivalents should appear in parentheses if necessary.
8. Symbols. A list of symbols used and their meanings should be included.
9. Page proofs. Authors will receive page proofs by E-mail. Proof pages will be in a .PDF file, which can be read by Acrobat Reader. Corrections on proof pages should be limited to the correction of errors. Authors should make the corrections on the PDF file and return it to the editorial office email box.
10. Index terms. With proof pages authors will receive a form for listing key words that will appear in the index. Please fill out this form with index terms and return it.
11. Copyright Information. All original journal articles are copyrighted in the name of DEStech Publications, Inc. All original articles accepted for publication must be accompanied by a signed copyright transfer agreement available from the journal editor. Previously copyrighted material used in an article can be published with the *written* permission of the copyright holder (see #14 below).
12. Headings. Your article should be structured with unnumbered headings. Normally two headings are used as follows:  
Main Subhead: DESIGN OF A MICROWAVE INSTALLATION Secondary Subhead: Principle of the Design Method  
If further subordination is required, please limit to no more than one (*Third Subhead*).
13. Equations. Number equations with Arabic numbers enclosed in parentheses at the right-hand margin. Type superscripts and subscripts clearly above or below the baseline, or mark them with a caret. Be sure that all symbols, letters, and numbers are distinguishable (e.g., "oh" or zero, one or lowercase "el," "vee" or Greek nu).
14. Permissions. The author of a paper is responsible for obtaining releases for the use of copyrighted figures, tables, or excerpts longer than 200 words used in his/her paper. Copyright releases are permissions to reprint previously copyrighted material. Releases must be obtained from the copyright holder, which is usually a publisher. Forms for copyright release will be sent by the editor to authors on request.

**Table 5. Comparison of state-of-the-art matrix resins with VPSP/BMI copolymers.**

Resin System	Core Temp. (DSC peak)	T <sub>E</sub>	Char Yield, %
Epoxy (MY720)	235	250	30
Bismaleimide (H795)	282	>400	48
VPSP/Bismaleimide copolymer			
C379: H795 = 1.9	245	>400	50
C379: H795 = 1.4	285	>400	53

**General:** DEStech journals and DEStech Publications, Inc. are not responsible for the views expressed by individual contributors in articles published in the journals.
